CAPE CAPRICORN.

SUBSIDIARY LIGHT FOR CLEARING ROCKY ISLET.

NOTICE is hereby given, that a Subsidiary Light for clearing Rocky Islet is placed at an elevation of 240 feet above high-water level, and S. 63° E. 230 feet from the revolving light at Cape Capricorn.

The light, the arrangement of which is somewhat similar to that of the subsidiary light at Bustard Head, is obscured by a screen through a sector of 29°, viz.:—from S.E. by E. $\frac{1}{2}$ E. to S.S.E. $\frac{1}{2}$ E., to a distance of one mile outside Rocky Islet, but is otherwise visible from a bearing of W. by N., to close in to the Eastern shore of Curtis Island. The North-eastern edge of the obscured sector passes half-a-mile outside the Islet, and the South-western or inner edge 3 cables inside the danger.

Vessels therefore passing outside the obscured part of the sector will not be in less than 13 fathoms while abreast of the Islet.

Vessels approaching from the Eastward should not open the main light to the Southward of the subsidiary light, as the lights when in line pass very close to the line of obscuration.

Vessels wishing to pass inside the Islet must keep the light in sight, northward of N.N.W. $\frac{1}{2}$ W.

The small light on the Northern pitch of the Cape is now no longer exhibited.

PORT DENISON.

ADDITIONAL LEADING LIGHT, SOUTH ENTRANCE.

NOTICE is hereby given, that two white Leading Lights are now exhibited—the north-eastermost of which is placed S. 83° E. 700 yards from Mount Bramston—which lead clear of the reef off the S.E. end of Stone Island.

The front light stands about 25 feet, and the back light 60 feet above high-water mark, at a distance of 1,500 feet apart.

Vessels, after rounding Cape Gloucester, should steer S.W. $\frac{1}{4}$ W. until these leading lights are brought into line on a S.W. by W. bearing, and then keep them in that position until the leading lights to the southward of the town are in line bearing N.W. $\frac{1}{4}$ W. The inner lights should then be kept in line until the anchorage is reached or the red sector of the light on North Head is opened out on a N.N.E. bearing.

NOTICE is hereby given, that Shoal Water has been observed by H.M.S. "Opal," about $1\frac{1}{2}$ miles to the Southward of the Island of Ambrym, and 2 miles to the Westward of the Reef marked on the Chart.

From the information received from an English trader, the depth of water on the shoal, which did not exist prior to a violent eruption of the volcano at Ambrym a few months ago, does not exceed 2 fathoms.

A Reef is said to extend $1\frac{1}{2}$ miles in a North-easterly direction from the next point to the N.E. of Dip Point.

The above information has been received from Rear-Admiral Fairfax.
