(d) No provision of this Part shall prevent the continued use of land for the use for which it was being lawfully used immediately prior to the Scheme having the force of law, or the repair and maintenance, for which the prior consent in writing of the Council has been obtained, of buildings or works lawfully existing on the land.

3.4.3 The Council, when considering granting its approval to a use marked AA in Table 1, will take into consideration the effect which such use will have on the amenity of the area likely to be affected by the use, the effect on the road system of the locality and any other matters which it may consider relevant to the establishment of the use, and may—

- grant approval;
- grant approval subject to such conditions and requirements as it deems fit; or
- refuse to grant approval, giving its reasons.

Without limiting the generality of the foregoing the Council may, where it deems appropriate, limit the period of validity of any approval granted and may grant approvals for development for limited periods of time.

3.4.4 The Council shall convey its decision on any such application for planning approval to the applicant within 60 days of the date upon which it was first received at the Council offices, unless the Council shall have first obtained the applicant's approval in writing for an extension of that period. In the event that a decision has not been made within that period or extended period the application shall be deemed to have been refused.

3.4.5 The following classes of development may be undertaken without the approval of the Council and are referred to as permitted development:—

- Development by public authorities and local authorities for the purpose of their undertaking of functions on land owned by them at the time of the coming into operation of this scheme.
- The maintenance and repair of any building provided that no works of a structural nature are being undertaken and no material change in the external appearance of the building is involved.
- Subject to the provisions of this scheme, changes in the uses of land and buildings which do not give rise to:—
  - a material change in the appearance of the property concerned;
  - the need, according to the provisions of this Scheme and/or as may be determined by the Council by experience of similar uses elsewhere, for additional car parking accommodation, loading and unloading accommodation, landscaping or other special site treatments;

- (iii) significant increases in the amount of traffic attracted to the site;
- (iv) the need for the provision of significantly improved public services and utilities of any kind.

#### PART IV Policies and General Provisions Relating to Zones.

4.1 Council's primary objective will be to ensure that development within the town occurs in accordance with social and economic needs and is consistent with retention and enhancement of the town's amenity for the benefit of residents.

4.1.1 Notwithstanding that a proposed development conforms in all other respects with the requirements of the Scheme, Council may at its discretion refuse to grant approval if in its opinion such development would, by its siting, design or construction, result in a significant deterioration of the amenity of landscape quality of the town.

#### 4.2 Residential Development: Residential Planning Codes.

4.2.1 For the purpose of this Scheme "Residential Planning Codes" means: The Residential Planning Codes adopted as a policy by the Board on 26 July 1982 together with all amendments or additions thereto or any Code, By-laws or Regulations replacing them and applying or being applicable within the District.

4.2.2 A copy of the Residential Planning Codes shall be kept and made available for public inspection at the offices of the Council.

4.2.3 In the event of there being any inconsistency between the Residential Planning Codes identified by Clauses 1.1 and 1.2 the provisions in the document identified in Clause 1.1 shall prevail.

4.2.4 Unless otherwise provided for in the Scheme the development of land for any of the residential purposes dealt with by the Residential Planning Codes shall conform to the provisions of those codes and the schedules to those codes.

4.3 Variations to Residential Planning Codes: Notwithstanding the provisions of the R.12.5 Residential Planning Code, Council may permit the front setback to be reduced to 6 metres.

4.4 Residential A Zone: Council's objective is to ensure that the zoned areas provide for low density residential uses within an urban environment of the highest possible standard, together with other uses and activities compatible with the basic use.

Council policy will therefore be to—

- (a) retain and enhance the residential environment of single and duplex houses.
- (b) permit certain non-residential uses as set out in Table 1 provided that these are of such nature, siting, and activity as to be compatible with the residential character of the zone;
- (c) permit, under annual registration, home occupations as defined in Part I of the Scheme subject to ensuring that such uses do not adversely affect the residential enjoyment of properties in the immediate vicinity.

4.4.1 Development for residential purposes within the zone shall conform to the provisions of the R.12.5 code.

4.5 Residential B Zone: Council's objective is to allow for development of flats and other forms of medium density residential housing to densities and standards appropriate to enhancement of the urban environment and to satisfaction of the various housing needs of the community.

Council policy will therefore be to—

- (a) adopt a residential density code permitting housing up to and including multiple unit housing, with provision for open space, where appropriate, so as to achieve an overall density approximating that existing in flat development in the town;

- (b) preclude home occupation from dwelling units other than detached or duplex houses except where home occupation does not entail direct sale to the public from the premises or the storage of goods for sale.

4.5.1 Development for residential purposes within the zone shall conform to the provisions of the R.50 code except that in new development where other than detached, attached, grouped houses, or multiple dwellings not greater than eight in number are proposed on a site, an area equivalent to one third of the total site shall be set aside for open space in addition to any other requirement of the Code.

4.6 Town Centre Zone: Council's objective is to ensure that the zoned area develops as the principal commercial, civic, and public activity area of Newman to maximum possible standards of civic design and function.

Council policy will therefore be to—

- (a) prepare and amend from time to time an overall strategy for the zone which takes into account appropriate disposition of Town Centre uses, economic servicing and proper standards of Civic design;
- (b) approve permitted uses provided these are proposed in accordance with the principles of the overall strategy.

4.6.1 Uses permitted by the Scheme will be subject to conformity with a Town Centre Strategy adopted by Council from time to time and with other provisions of the Scheme.

4.7 Commercial Zone: Council's objective is to permit development of shopping and other commercial uses on lots not within the Town Centre so as to provide for localised community shopping in association with residential precincts.

Council policy will therefore be to—

- (a) initiate procedures for re-zoning to Commercial of land appropriately situated so as to provide for convenience shopping and other further uses within the residential precincts;
- (b) ensure that proposals for local convenience shopping are limited to a retail floor space of 300 square metres;
- (c) require applications for re-zoning to show that the site proposed is of adequate size and suitable location so as to conform to the car parking provisions of the Scheme and to ensure proper accessibility and traffic safety.

4.8 Industrial Zone: Council's objective is to ensure provision for uses of an industrial nature, and to encourage re-location of such uses into the area from residential and commercial zones.

Council policy will therefore be to—

- (a) ensure development of a range of lot sizes in stages according to requirements and servicing considerations;
- (b) require reticulated water supply to be provided to each lot, and a satisfactory method of on site disposal of effluent to be approved as a condition of building.
- (c) exercise adequate controls over developments and use so as to ensure a satisfactory visual standard prevails.

4.8.1 Within the zone the following shall apply: For industries uses—

- Minimum Lot size—1 500 square metres.
- Minimum Lot frontage—30 metres.

4.8.2 Between the frontage of a lot and the building line, land shall not be used for any purpose other than—

- (a) vehicle parking;
- (b) landscaping;
- (c) with the approval of Council, Trade Display.

#### 4.9 Car Parking.

4.9.2 Notwithstanding the provisions of Table 2 Council may waive requirements for on site car parking if it is satisfied that adequate constructed car parking has been provided in close proximity to the proposed development. Where constructed car parking is not available Council may accept a cash payment in lieu of provision of parking for application in terms of Clause 4.9.3 below.

4.9.3 Any payment made in terms of Clause 4.9.2 above shall—

- (a) not be less than the estimated cost of providing and constructing the parking spaces required by the Scheme, plus the value, as estimated by the Chief Valuer of the Department of State Taxation, of the area of land which might have been occupied by the parking spaces;
- (b) be paid to Council under this clause, into a special fund to be applied solely to the provision, construction and maintenance of further car parking facilities in reasonable proximity to the premises from which the monies were derived.
